

Research Specialist Wanted!

Where: at [Yair Mau's](#) research group, at the [Rehovot campus](#) of the Hebrew University

We are looking for a part-time Research Specialist to work on the mathematical modeling of environmental questions. Our research deals with water and carbon dynamics in the soil-plant-atmosphere continuum, ecohydrology, soil degradation, desertification. The research specialist, together with the PI, will develop models based on ODEs and PDEs, and will analyze them with computer code. No previous experience in environmental science is required, but mathematical and programming skills are necessary.
